# Delivering solutions that help you **succeed.**

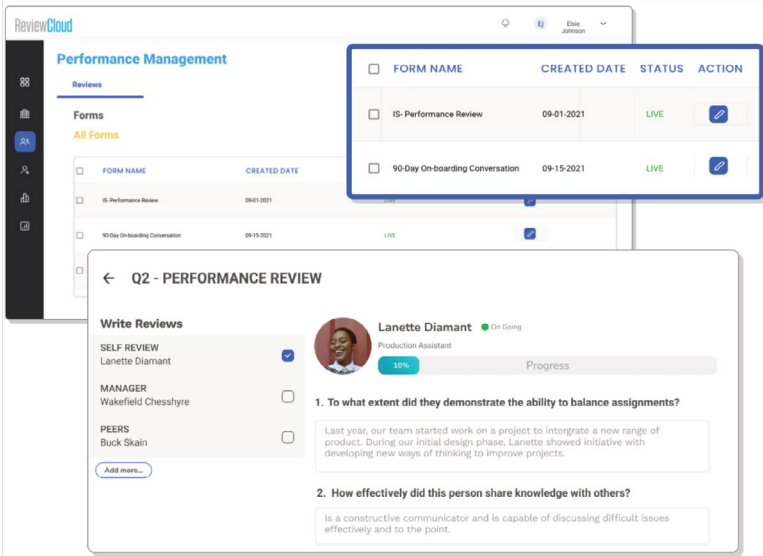

ReviewCloud simplifies performance management so you can focus on high-quality feedback instead of managing process. Bring employees from disengaged to engaged with this customizable employee performance solution.

## Bring employees from disengaged to **engaged.**

- Learning-centered reviews, conversations, & self-evaluations
- Better goal tracking & accountability
- Automated scheduling & reminders
- Easily transfer results to your HRIS

The screenshot displays the ReviewCloud 'Users' management page. At the top, there are four summary cards: 7 Active Users (Total: 8), 2 User Groups within Org, 7 Welcome Emails Not sent, and 7 Password changes. Below these are buttons for 'Bulk Action', 'Export Report', 'Add User', and a search bar. A table lists users with columns for First Name, Last Name, Email, User Type, Manager, and Department. An overlay window titled 'Q2 - PERFORMANCE REVIEW' is shown, featuring a 'Write Reviews' section with 'SELF REVIEW' by Lanette Diamant (checked) and 'PEERS' by Buck Skain. A progress bar for Lanette Diamant shows 10% completion.

## More feedback, more analytics, more information.

- Real-time dashboard analytics
- Unlimited events & feedback forms
- Easily manage employee profile & history
- Upload previous records for seamless management

## Learning-centered, performance growth.

- Knowledgebase & training videos
- Structured communication aligned to your mission
- Transfer training results into TRAKSafety to improve compliance management

## Performance reviews don't have to be hard.

Managers often don't know how to give useful feedback, and employers often don't know how to take criticism and grow from it. Worst, many employers often focus on metrics that don't connect to an employee's psychological needs.

At ReviewCloud, we simplify performance management processes so you can focus on the quality of feedback. "Making it easy" means we combine software, service and content to reduce costs and improve engagement.
