Bundle with Content for Savings

TraineryLMS® technology was built based on customer feedback, creating a user-centric learning platform that streamlines—and customizes—the training and administration process from beginning to end. Explore our powerful features that help great teams grow.

Potential starts **here**.

A Trainery LEARNING Solution
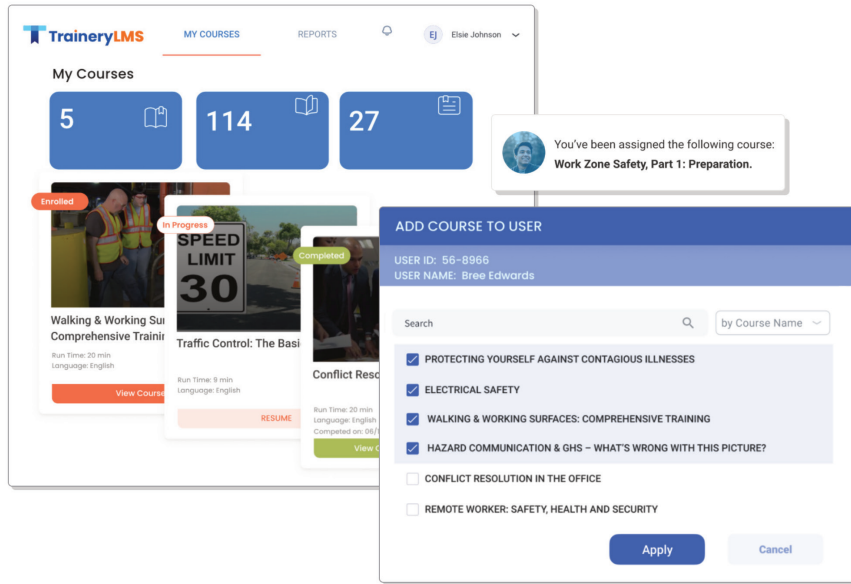

Clearly see what's working.

Robust Administrative Functions

- Make sure the right people are viewing the right information. Our Role-Based Dashboard defines view and secures information access.
- Assign learning to specific groups and job roles; easily assign tasks using multi-level 'branches'.

- Always know where you stand with real-time metrics to monitor assignments, activity, and compliance.
- Digitally store certificates, licenses, and learning records.

- Easily transition your historical training records to TraineryLMS® without loss of information.
- Seamlessly integrate Trainery LEARNING and HCM modules for a full **Talent Management Solution**.

TraineryLMS®

More courses, more learning.

Robust Administrative Functions

- 5K+ HR, Safety, Regulatory & Sector-Specific courses in the Content Library.
- Training support, including Leader Guides, available with designated courses.
- Required e-signatures can be captured & stored, along with custom support materials.
- Courses created by the industry's top 20 producers + custom content development.
- Use our LMS for your content, or put our content in your LMS with digital licensing.
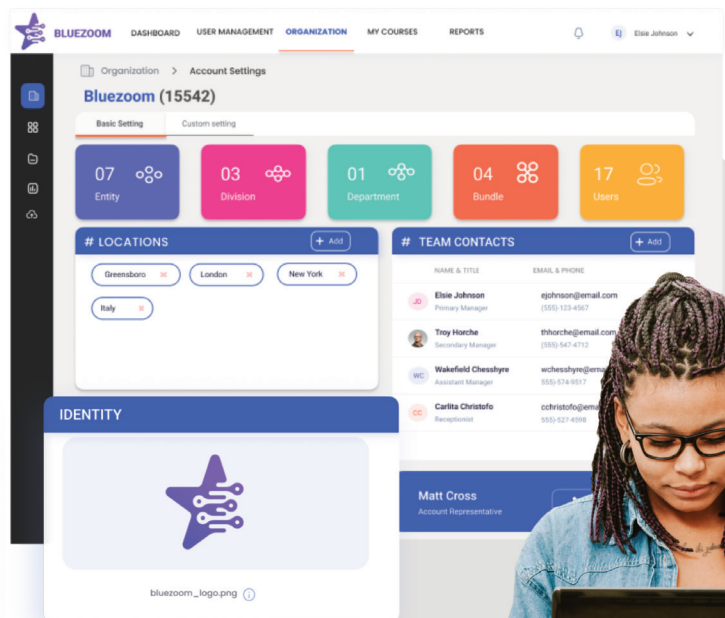

Timely, effective communication.

A full suite of communication tools help you effectively manage training programs.

- Setup automatic communications for new enrollments.
- Automate emails for approaching due dates, expiring, and completed training.
- Integrate group messaging and calendar assignments.
- Personalize the platform with your brand logo and colors.

A complete report of online training performance.

Administrators get a full picture of online training performance to help improve learning operations & strategies.

- Get a quick snapshot or dive-in deeper with pre-built reports that are ready to go.
- Standard reports include Learner Activity & Progress, Department Progress, Course Activity, and Certification Status.

- Add custom information fields to User profiles to enrich the details you collect & report.
- Configure reports to your exact preferences, show or hide relevant columns, reorder, set dynamic data filters, and more.

- Custom programming for unique configurations available.
